What are the advantages of online education?

- Disadvantages of Online Education:

Lose Concentration: Without having proper care for students while online classes by teachers they can easily lose focus on studies. Also, virtual classes can be done through phone or laptop gadgets where students can easily move to games or videos or youtube for entertainment. This completely makes them go off track from subject studies.

Health Issues: Many parents are worried about their child's health as it is unhealthy to sit for hours in front of a computer screen. Looking at the screen for too long can also damage their eyesight. Not only that, back problems due to incorrect sitting positions may arise.

Expensive: We know that you have been confused after seeing this disadvantage. As we have said earlier that it is less in cost but it is also expensive for economically weaker students. Parents who are jobless due to covid can not afford smartphones or computers for students' online learnings. In such cases, digital learning may be accessible but it's not readily affordable.

Lack of socializing skills: As there is no socializing included in digital learning several students who study through digital mode can not acquire socializing skills. Also, it may lead to a decrease in the cooperative skills of a student.

Isolation: While digital education has its perks many students feel a sense of isolation and become depressed. This is due to little to no human contact and socializing with peers. Both students and teachers alike are prone to loneliness in virtual learning.

Limited: Digital learning does not apply to all disciplines and subjects. Areas that require practicals like engineering, medical science, and other STEM subjects cannot be implemented fully with digital classes. Moreover, some practicals cannot be learned virtually.

Lack of Good Internet connection: As we all know that online classes/learning are more flexible and accessible from anywhere conveniently with the help of a good internet connection. If you are failed to connect your phone or computer with good internet connectivity, then you may miss a lot of important stuff because of buffering. Also, for a good internet connection parents need to spend money on a monthly or yearly basis which is a disadvantage for poor and middle-class families.

There are also many other disadvantages of online education.
